DELAWARE RIVER BASIN COMMISSION

Meeting and Public Hearing

The Delaware River Basin Commission (Commission) will hold a public hearing on Tuesday, May 7, 2013, and a business meeting will be held on Wednesday, May 8, 2013. Both the hearing and business meeting are open to the public and will be held at the Washington Crossing Historic Park Visitor Center, 1112 River Road, Washington Crossing, PA 18977.

Public hearing. The public hearing on May 7, 2013, will run from 12 p.m. until approximately 4 p.m. Hearing items will include draft dockets relating to the projects listed as follows and resolutions to: (a) adopt the Commission's annual Budget for the Fiscal Year (FY) ending June 30, 2014, and apportion among the Signatory Parties the amounts required for the support of the Current Expense and Capital Budgets; (b) approve the FY 2014-2016 Water Resources Program; and (c) amend the Commission's administrative agreements with Delaware and New Jersey by the addition to “Category F” as defined therein of certain electric generation and cogeneration facilities. In particular, the latter resolution would provide for the state agency's review and decision making process to be used in lieu of the Commission's for the category of projects consisting of electric generation and cogeneration facilities that consumptively use in excess of 100,000 gallons per day (gpd) of water during any 30-day period, when no other aspect of the project, such as a withdrawal or discharge, subjects it to Commission review under the Commission’s Rules of Practice and Procedure and current administrative agreements.

The public is advised to check the Commission’s web site at www.drbc.net periodically prior to the hearing date, as projects may be dropped if additional time is deemed necessary to complete the Commission’s review. Written comments on all hearing items will be accepted through the close of the May 7, 2013, hearing.

Draft dockets and resolutions scheduled for hearing will be posted on the Commission's previously listed web site 10 days prior to the hearing date. Additional public records relating to the hearing items may be examined at the Commission’s offices. Contact Project Review Section assistant Victoria Lawson at (609) 883-9500, Ext. 216 with any questions concerning these items.

Referendum on Continuation of the Pennsylvania Vegetable Marketing and Research Program

Under the applicable provisions of 3 Pa.C.S. Chapter 45 (relating to Agricultural Commodities Marketing Act), a review referendum was held from March 4 to March 18, 2013, to determine if the producers affected by the Pennsylvania Vegetable Marketing and Research Program (program) desired to continue the program for an additional 5 years. To pass, a majority of eligible producers voting had to vote in favor of the program’s continuation. An impartial Teller Committee met on March 27, 2013, to count the ballots. The following results were submitted by the Teller Committee: a total of 466 eligible votes were cast with 396 producers voting in favor of and 70 voting against the continuation of the program. An additional eight ballots were invalid because five were not signed and three were postmarked and received after the deadline. Votes favoring continuation of the program by number of producers represented 85% of eligible votes and votes against continuation of the program represented 15% of eligible votes. Because a majority of the votes were cast in favor of the program, the program shall continue for 5 years, effective immediately.

discharge of stormwater associated with construction activities will be managed in accordance with the requirements of 25 Pa. Code Chapter 102. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the United States Environmental Protection Agency (EPA) Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on NPDES applications are invited to submit statements to the contact office noted before the application within 30 days from the date of this public notice. Persons wishing to comment on WQM permit applications are invited to submit statements to the office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. A comment submittal should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for public hearings on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the Pennsylvania Bulletin and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY
PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS NEW SOURCES AND MODIFICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of these applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office listed before the applications. Persons interested in reviewing the application files should contact the appropriate regional office to schedule appointments.

Persons wishing to receive a copy of a proposed Plan Approval or Operating Permit shall indicate interests to the Department regional office within 30 days of the date of this notice and shall file protests or comments on a proposed Plan Approval or Operating Permit within 30 days of the Department providing a copy of the proposed documents to persons or within 30 days of its publication in the Pennsylvania Bulletin, whichever comes first. Interested persons may also request that hearings be held concerning a proposed Plan Approval or Operating Permit. A comment or protest filed with the Department regional office shall include a concise statement of the objections to the issuance of the Plan Approval or Operating Permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the Pennsylvania Bulletin at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

PLAN APPROVALS

Plan Approval Applications Received under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B that may have special public interest. These applications are in review and no decision on disposition has been reached.

43-270H: CCL Container (1 Llodio Drive, Hermitage, PA 16148) for installation of a new regenerative thermal oxidizer (RTO) to control VOC emissions for sources 106 through 109 in Hermitage City, Mercer County. The existing RTO (control device C05) will be used to control VOC emissions for sources 101 through 105. The facility manufactures aluminum cans used for packaging various consumer products and is permitted under synthetic minor operating permit #43-00270.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

46-0044B: Glasgow, Inc. (Church & Flint Hill Roads, King of Prussia, PA 19406) for installation of two (2) replacement secondary crushers for the existing secondary stone crushing plant at their McCoy Quarry facility in Upper Merion Township, Montgomery County and is a non-Title V facility.
Particulate matter ("PM") emissions from the replacement secondary crushers will be controlled by the existing water spray dust suppression system and enclosure associated with the secondary stone crushing plant. As the rated capacities of the proposed replacement secondary crushers are less than those of the current secondary crushers, no increase in the potential to emit PM is expected from the project.

The plan approval will include monitoring, recordkeeping, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements.

37-327A: R. Cunningham Funeral Home Inc. (2429 Wilmington Road, New Castle, PA 15195) to issue a plan approval for authorization to continue operation of two existing crematories (one human and one animal) at their existing facility in the City of New Castle, Lawrence County. Public notice is required for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44.

The facility consists of one human and one pet crematory each installed January 18, 2008 under authorization from GP14-37-327. This plan approval application was submitted per the Department’s instruction that those crematories which open their primary chamber’s door during operation could no longer use the GP-14 for authorization and must be authorized by a plan approval or discontinue the opening of the door during the cremation cycle and continue to maintain their GP-14. Cunningham has elected to apply for a plan approval rather than discontinue the opening of their door which they feel is necessary for efficient and complete cremation cycles.

Emissions are estimated to be: less than 1.5 tons per year (tpy) of particulate matter, less than 1.0 tpy (each) of SOx, NOx, CO, VOC, and HAP.

This plan approval will be subject to special conditions [25 Pa. Code § 127.12(b)]:

**WORK PRACTICE**

1) The crematories’ burners shall be operated and maintained as prescribed by the manufacturer. A copy of the burner’s operational and maintenance literature shall be maintained onsite with the units at all times.

2) The owner/operator may only cremate human or animal remains and the container used to transport the remains. The head of an animal carcass infected with rabies must be removed before the remainder of the carcass is burned. Rabies infected tissue may not be incinerated at this facility.

3) The owner/operator of the crematory must ensure that all medical devices (e.g. pacemakers, defibrillators, etc.) and potentially hazardous remedial devices (e.g. radioactive implants, etc.) have been removed from bodies and properly disposed of prior to cremation. Documentation certifying compliance with this requirement shall be maintained for each cremation.

4) The crematory shall be:
   
a) Operated in such a manner as not to cause air pollution, as defined in 25 Pa. Code § 121.1.

   b) Operated and maintained in a manner consistent with good operating and maintenance practices.

   c) Attended by a trained operator at all times when the unit is in operation.
d. Operated and maintained in accordance with the manufacturer's specifications and the applicable terms and conditions of this Permit.

e. Operated such that the temperature at the exit of the secondary chamber shall be maintained at or above 1800° F throughout the cremation cycle.

f. Observed by a trained operator for stack emissions. The permittee shall verify compliance with visible, fugitive, and odor emission limitations through the following procedures:

1) The permittee shall observe the exhaust stack and the premise of the crematory at least once during each cremation cycle for the presence of any visible, fugitive, or odor emissions;

2) If any visible, fugitive, or odor emissions are apparent, the permittee shall take immediate action to eliminate them and record/describe the event in a log. The log entry shall at a minimum include the items described in Monitoring Condition 2c.(1)–(6); and

3) If any visible emissions are apparent after the corrective action, the crematory shall not start another cremation cycle until the permittee can verify compliance with the visible emission limitations specified in this plan approval through methods prescribed in 25 Pa. Code § 123.43 (relating to measuring techniques), such as Method 9 readings taken by a certified visible emissions reader.

4) Lit with adequate artificial lighting of the plume at the stack outlet to enable observations of stack emissions at night, if nighttime operation of the crematory is to occur.

5) The crematory will be required to have an interlock system that meets specific requirements identified by the Department.

b. The operator may open the loading door to the crematory during the cremation cycle to inspect and, if deemed necessary, reposition the charge. However, the operator is still required to ensure that the crematory is operated in compliance with all terms and conditions specified in this operating permit, and that the emission of air contaminants from the crematory does not exceed any of the restrictions specified in this operating permit or established pursuant to any applicable rule or regulation contained in 25 Pa. Code Article III.

c. The operator shall monitor the crematory for visible air contaminant emissions, via the opacity sensor of the crematory or via direct observation of the crematory's stack, whenever the loading door is opened for inspection and repositioning of the charge.

d. The permittee shall ensure that the opacity sensor of this crematory is set to activate at 10% opacity.

6) The operator shall be familiar with and follow the manufacturer's recommend procedure for the cremation of an obese individual. A physical copy of the procedure shall be maintained with the unit at all times.

7) The manufacturer's representative or another qualified technician shall adjust the burners after the unit is constructed and before a new unit is first operated and at other appropriate times such as when the use of an approved fuel is initiated and when visible emissions are observed.

8) The manufacturer's representative or another qualified training source shall provide adequate instruction to all operators of each new crematory and to new operators of existing crematories including hands-on control of the unit for at least two operating cycles. The training will need to include specific elements identified by the Department at a minimum.

MONITORING

1) The owner/operator shall install, maintain, and operate continuous temperature monitors to measure the temperatures at the exit from the primary combustion chamber and at the exit from the secondary (or last) chamber of the crematory. Sensors shall be located such that flames from the burners do not impinge on the sensors. These temperatures shall be recorded in either analog or digital read-only format.

2) All detectable objectionable odors that originate on-site and cross the property line, as well as visible and/or fugitive air contaminant emissions that originate on-site, shall:

   a. Be investigated.

   b. Be reported to the facility management, or individu- al(s) designated by the permittee.

   c. Be recorded in a permanent written log which, at a minimum, shall include items specifically identified by the Department.

3) The Department reserves the right to change the above monitoring requirements at any time, based on, but not limited to, the review of complaints, monitoring results, and/or Department findings.

RECORDKEEPING

1) The owner/operator will be required to maintain records identified by the Department which demonstrate compliance with the requirements of this plan approval and demonstrate proper operation and maintenance of the crematory.

2) The permittee shall maintain all logs on-site for a minimum period of five years and shall furnish these records to the Department upon request.

EMISSION RESTRICTIONS

1) No person may permit the emission to the outdoor atmosphere of particulate matter from any incinerator, at any time, in such a manner that the particulate matter concentration in the effluent gas exceeds 0.08 gr/dscf, corrected to 7% oxygen. (Filterable Only)

2) Visible emissions shall not exceed either of the following limitations:

   a. Equal to or greater than 10% for a period or periods aggregating more than three minutes in any 1 hour;

   b. Equal to or greater than 30% at any time.

3) A person may not permit the emission into the outdoor atmosphere of any malodorous air contaminants from any source in such a manner that the malodors are detectable outside the property of the person on whose land the source is being operated.

REPORTING

The owner/operator will be required to report malfunctions to the Department per specific conditions. Other

1) The operator shall not use the crematory to dispose of any animals used for commercial or medical experimentation purposes.

2) The owner or operator of any crematory authorized to use this General Permit may not cremate human or
animal bodies whose weight exceeds 500 pounds, including the weight of the container.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<table>
<thead>
<tr>
<th>Parameter</th>
<th>30-Day Average</th>
<th>Daily Maximum</th>
<th>Instantaneous Maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Iron (Total)</td>
<td>3.0 mg/l</td>
<td>6.0 mg/l</td>
<td>7.0 mg/l</td>
</tr>
<tr>
<td>Manganese (Total)</td>
<td>2.0 mg/l</td>
<td>4.0 mg/l</td>
<td>5.0 mg/l</td>
</tr>
<tr>
<td>Suspended solids</td>
<td>35 mg/l</td>
<td>70 mg/l</td>
<td>90 mg/l</td>
</tr>
<tr>
<td>pH*</td>
<td></td>
<td></td>
<td>greater than 6.0; less than 9.0</td>
</tr>
</tbody>
</table>

* The parameter is applicable at all times.

In addition, the Department imposes a technology-based aluminum limit of 2.0 mg/l (30 day average) to protect stream uses.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.
Effluent Limits for Noncoal Mining Activities

The BAT limits for noncoal mining activities as provided in 40 CFR Part 436 and 25 Pa. Code Chapter 77 are as follows:

<table>
<thead>
<tr>
<th>Parameter</th>
<th>30-day Average</th>
<th>Daily Maximum</th>
<th>Instantaneous Maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Suspended solids</td>
<td>35 mg/l</td>
<td>70 mg/l</td>
<td>90 mg/l</td>
</tr>
<tr>
<td>Alkalinity exceeding acidity*</td>
<td></td>
<td></td>
<td>greater than 6.0; less than 9.0</td>
</tr>
<tr>
<td>pH*</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* The parameter is applicable at all times.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the Pennsylvania Bulletin and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board. Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Plan Description: The planning module for the Harold Deardorff Jr Subdivision, DEP Code No. A3-67919-437-2, APS Id 804388, consisting of a four lot residential subdivision to be served by individual lot sewage disposal systems is disapproved. The proposed development is located on the south side of Pinetown Road, approximately 2300 feet east of Moore's Mountain Road in Fairview Township. This plan is disapproved because the minimum lot size as determined by the preliminary hydrologic study is 2.01 acres. Proposed Lots 3 and 4 do not meet this required minimum lot size and therefore do not have the area required to infiltrate the amount of groundwater recharge necessary to successfully dilute the nitrate-nitrogen from each lot's sewage discharge. The average nitrate-nitrogen levels in the groundwater leaving these lots will exceed 10 mg/l.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the Pennsylvania Bulletin a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the Pennsylvania Bulletin. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediaion Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediaion Standards Act (act) require the Department to publish in the Pennsylvania Bulletin a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Patient Safety Trust Fund Surcharge for Fiscal Year 2012-2013 as Provided for under the Medical Care Availability and Reduction of Error (MCARE) Act

Because of an inadvertent error in the notice published at 43 Pa.B. 1934 (April 6, 2013), the Department of Health (Department) is reprinting the document in its entirety to ensure accuracy of the information contained in this document.

On March 20, 2002, the Medical Care Availability and Reduction of Error (MCARE) Act (MCARE Act) (40 P.S. §§ 1303.101—1303.910) was enacted. Among other provisions, the MCARE Act established the Patient Safety Authority (Authority) to collect, analyze and evaluate data regarding reports of serious events and incidents occurring in certain medical facilities and to make recommendations to those facilities regarding changes, trends and improvements in health care practices and procedures for the purpose of reducing the number and severity of serious events and incidents.

Section 305(a) of the MCARE Act (40 P.S. § 1303.305(a)) authorizes the establishment of a Patient Safety Trust Fund (Fund) for the operations of the Authority. Section 305(c) of the MCARE Act states that beginning July 1, 2002, and for every fiscal year thereafter, each medical facility covered by the MCARE Act shall pay the Department a surcharge on its licensing fee as necessary to provide sufficient revenues for the Authority to operate. Section 305(c) of the MCARE Act also states that the total assessment amount for Fiscal Year (FY) 2002-2003 shall not exceed $5 million and that the Department shall transfer the total assessment amount to the Fund within 30 days of receipt. Section 305(d) of the MCARE Act provides that for each succeeding calendar year, the Department shall determine and assess each medical facility a proportionate share of the Authority’s budget. The base amount of $5 million provided for in FY 2002-2003 shall be increased no more than the Consumer Price Index in each succeeding fiscal year.

Initially, the surcharge was assessed on ambulatory surgical facilities (ASF), birth centers and hospitals. Subsequently, the MCARE Act was amended and certain abortion facilities were also required to pay the surcharge.

With the cooperation of hospitals, birthing centers, abortion facilities and ambulatory surgery facilities in this Commonwealth, the surcharge has been implemented and has provided resources for the implementation of the web-based Pennsylvania Patient Safety Reporting System and the operation of the Authority.

This notice sets forth the procedure that the Department will follow in assessing and collecting the surcharge for FY 2012-2013. The Authority FY 2012-2013 surcharge assessment is $5.5 million. The MCARE Act states that the surcharge shall be collected from medical facilities, which are defined as ASFs, birth centers and hospitals licensed under either the Health Care Facilities Act (35 P.S. §§ 448.101—448.904b) or Article X of the Public Welfare Code (62 P.S. §§ 1001—1058). Also included, as of May 1, 2006, are abortion facilities which are defined in 18 Pa.C.S. § 3203 (relating to definitions) and which perform 100 or more abortions during a calendar year. Nursing homes, which are assessed under sections 401—411 of the MCARE Act (40 P.S. §§ 1303.401—1303.411), receive a separate assessment notification.

To assess the surcharge in an equitable manner, the Department continues to use a common denominator in these facilities. For ASFs, birth centers and abortion facilities, the Department has chosen the number of operating and procedure rooms. For hospitals, the Department has chosen the number of beds contained on the license of each hospital, whether by the Department (general and special acute care hospitals) or the Department of Public Welfare (privately owned psychiatric hospitals). It was also necessary to pick a point in time to make this assessment; the Department has chosen December 31, 2012.

The number of operating/procedure rooms (for ASFs, birth centers and abortion facilities) and the number of licensed beds (for hospitals) was totaled and that number was divided into $5.5 million to arrive at a charge per unit for the assessment. The total number of units (operating rooms, procedure rooms and licensed beds) is 43,041. Dividing this number into $5.5 million results in a per unit assessment for each installment of approximately $127.78.

To obtain a copy of the assessment for all facilities, send an e-mail to paexcept@pa.gov, and request the 2012-2013 MCARE surcharge assessment list.

Each facility will receive notification from the Department setting forth the amount due, date due and the name and address to which the payment should be sent. Payment will be due within 60 days. The MCARE Act authorized the Department to assess an administrative penalty of $1,000 per day on facilities who fail to pay the surcharge by the due date.

Pennsylvania Gaming Control Board Regulation #125-166 (IRRC #2981)

Slot Machines and Table Game Controls, Equipment, Credit and Rules
April 10, 2013

We submit for your consideration the following comments on the proposed rulemaking published in the February 9, 2013 Pennsylvania Bulletin. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P. S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P. S. § 745.5a(a)) directs the Pennsylvania Gaming Control Board (Board) to respond to all comments received from us or any other source.

1. § 627a.7. Wagers.—Miscellaneous clarity.

House Money Wager

In paragraph (a)(7), we have clarity concerns related to subparagraphs (i) and (ii), which appear to be inconsistent. According to subparagraph (i), a House Money Wager shall “win if the first two cards of either the Player’s Hand or Banker’s Hand, or both, are a pair.” In this situation, a player wins if the first two cards of either the player’s hand or banker’s hand is a pair. However, under subparagraph (ii), a House Money Wager shall “lose if the first two cards of either the Player’s Hand or Banker’s Hand do not contain a pair.” (Emphasis added.) We ask the Board to clarify the circumstances when a House Money Wager would win and when a House Money Wager would lose.

We ask the Board to address similar issues in § 629a.7(a)(7)(i) and (ii) (relating to wagers in Midibaccarat), as well as § 631a.8(a)(7)(i) and (ii) (relating to wagers in Baccarat).

2. § 659a.6. Asia Poker rankings.—Miscellaneous clarity.

Joker

Subsection (a) describes how the joker shall be used and ranked for completion of a straight, flush, straight
flush or royal flush. Subsection (b) ranks the permissible Poker hands at the game of Asia Poker. In ranking the hands, paragraph (b)(1) includes the use of a joker, whereas paragraphs (b)(2), (b)(3), (b)(5) and (b)(6) do not include the use of the joker. We ask that the Board clarify these provisions to ensure consistency in the use of the joker.

Similarly, we ask the Board to review and clarify subsection (d) regarding the use of the joker.

3. § 659a.10. Procedures for dealing the cards from an automated dealing shoe.—Miscellaneous clarity.

Determining the starting position

Paragraph (a)(2) states that the dealer shall use the procedures authorized under § 659a.5(g) to determine the starting position for dealing the cards; however, paragraph (a)(1) already requires that the procedures under § 659a.5 (relating to shuffle and cut of the cards; procedures for determining the starting position for dealing cards) have been completed. We ask the Board to review and clarify these two provisions.

4. § 663a.11. Procedures for completion of each round of play.—Miscellaneous clarity.

Losing Tie Wagers

Paragraph (j)(1) provides for a player to place a Tie Wager. Subparagraph (j)(1)(i) requires a dealer to pay winning Tie Wagers if the high hand or low hand, or both, of the player is identical in point value with the high hand, low hand, or both, of the dealer. However, subparagraph (j)(1)(ii) requires a dealer to collect losing Tie Wagers if the high hand or low hand of the player is not identical in point value with the high hand or low hand of the dealer. Subparagraph (j)(1)(ii) seems to contradict (j)(1)(i). It is unclear whether the Board intends for a player who places a Tie Wager to win or lose if the high hand is identical in point value to the dealer but the low hand is not identical in point value to the dealer, or vice versa (i.e., high hand is not identical in point value but low hand is identical in point value). We ask the Board to review subparagraph (j)(1)(ii) and clarify the circumstances when the dealer shall collect all losing Tie Wagers.

5. Miscellaneous clarity.

In § 663a.6(a), the Board should correct the second sentence to read, “The point value of all non-face cards is their denomination.”

Chairperson

**INSURANCE DEPARTMENT**

Affordable Care Act; Guidance for Compliance Submissions; Notice 2013-03

The Affordable Care Act (ACA)—that is, Patient Protection and Affordable Care Act (Pub. L. No. 111-148) and the Health Care and Education Reconciliation Act of 2010 (Pub. L. No. 111-152), collectively and as amended—sets forth market reform requirements for plan years beginning on or after January 1, 2014, for, individual and small group health insurance policies that provide “major medical” coverage, which is comprehensive health coverage, including PPO and HMO coverage. The ACA also sets forth requirements for a plan to be a qualified health plan (QHP), so that the plan may be certified for offering on an exchange. Finally, the ACA contains several provisions that will impact rate development.

The Insurance Department (Department) provides the following guidance to insurance entities seeking to demonstrate compliance with the ACA relative to new or modified policy forms offered, issued or renewed in this Commonwealth. This guidance applies to new policy forms, as well as to policy forms for which an insurance entity (insurer) is not seeking to make any changes other than as necessary to make the policy form comply with the ACA. Further, it applies to any plan an insurer anticipates may be certified as a QHP.
If an insurer is required under the act of December 22, 2011 (P. L. 614, No. 134) to file a policy form or policy form modification with the Department for prior approval, or if an insurer is intending to use after January 1, 2014, a form not required to be filed, that is, a “product” as contemplated by the ACA, the Commonwealth will accept as evidence of satisfying the ACA market reform requirements a “Compliance Checklist and Certification,” with the Market Reform portion of the Compliance Checklist filled out and the Certification executed by an authorized representative of the insurer, when the Compliance Checklist and Certification is substantially identical to the “Compliance Checklist and Certification” as Attachment A. Attachment A is also available on the Department’s web site at www.insurance.pa.gov. File a form with each policy form or policy form modification being submitted.

If an insurer is anticipating that any form/product along with its associated plans may be certified as a QHP and offered on an exchange, the Commonwealth will accept as evidence of satisfying the ACA QHP requirements a Compliance Checklist and Certification, with both the Market Reform and the QHP portions of the Compliance Checklist filled out and the Certification executed by an authorized representative of the insurer, when the Compliance Checklist and Certification is substantially identical to the “Compliance Checklist and Certification” as Attachment A. Attachment A is also available on the Department’s web site. File a Compliance Checklist and Certification with each form/product and its associated plans being submitted. In addition to any Federally-facilitated exchange filing requirement (that is, HIOS), also include the QHP Application Templates in the SERFF filing, as instructed in SERFF.

Further, with respect to the ACA rating requirements, including those amending the Public Health Service Act (PHSA) (42 U.S.C.A. §§ 201—300mm-61) and as further explained in Federal regulations, the Department requests that an actuarial memorandum be submitted as part of a rate filing for a product or plan subject to the ACA. In that actuarial memorandum, submitters are requested to:

- State the anticipated loss ratio (see ACA § 1001, PHSA § 2718, noting also compliance with 31 Pa. Code § 89.83(b) (relating to rates)).
- Specify compliance with the rating requirements in the ACA, that is, use of no rating factors other than: (i) age (premium band ratio not exceeding 3.1 and Federally approved standard age curve); (ii) tobacco use (premium band ratio not exceeding 1.5:1); (iii) family size (as specified in Federal regulation); and (iv) geography (State rating regions as Federally approved, listed in Attachment B, and also shown in map form on the Department’s web site) (see ACA § 1201, PHSA § 2701).
- Specify compliance with the single risk pool per market (individual or small group) requirement (see ACA § 1312).

Additional information may be found in the general instructions in SERFF.

Finally, while certain forms and rates referenced in this notice are subject to review and approval by the Department prior to use, the Department reminds filing entities that those forms and rates (and all forms and rates used in this Commonwealth) remain subject to, and must comply in all respects with, the Commonwealth’s insurance laws and regulations, and the Department retains its ability to take after-use enforcement action and seek any available remedy for noncompliant forms or rates. An insurer will be responsible for assuring that all of its insureds are provided the full benefits provided by the ACA.

Questions regarding this notice may be directed to Peter Camacci, Director, Bureau of Life, Accident and Health Insurance, Insurance Department, 1311 Strawberry Square, Harrisburg, PA 17120, (717) 787-0762 or pcamacci@state.pa.us.

Attachment A
Pennsylvania Compliance Checklist and Certification (relating to market reform requirements and QHP certification requirements of the ACA)

Attachment B
Geographic Rating Areas for Individual and Small Group Markets (relating to market reform requirements of the ACA)

Attachment A
Compliance Checklist and Certification

If an entity (the "Company") submits a form filing to the Commonwealth, or intends to use after January 1, 2014 a form not required to be filed, that is, a “product” as contemplated by the ACA, where that form/product is intended to comply with the market reform requirements or the market reform and qualified health plan requirements of the Affordable Care Act (ACA), the Commonwealth will accept as demonstrating compliance with those requirements a compliance checklist and certification submitted with your contract/endorsement via SERFF as a Form Schedule document, substantially identical to this Compliance Checklist and Certification. These ACA requirements apply only to policies for health insurance coverage referred to as “major medical” in the statute, which is comprehensive health coverage, including PPO and HMO coverage. This checklist identifies the requirements for small group and individual plans, and, where specified, for grandfathered plans (coverage in effect prior to March 23, 2010). Refer to the relevant statute and any applicable regulations to ensure compliance. Complete each item applicable to your product category to confirm that diligent consideration has been given to each statutory requirement as to each plan encompassed by the identified form/product. Additionally, complete the QHP Requirements portion of this checklist for any policy form/product intended to be offered as a qualified health plan. PENNSYLVANIA PUBLIC UTILITY COMMISSION

Extension of the Fuel Cost Recovery Surcharge Special Permission 28207

Public Meeting held
April 4, 2013

Commissioners Present: Robert F. Powelson, Chairperson; John F. Coleman, Jr., Vice Chairperson; Wayne E. Gardner; James H. Cawley; Pamela A. Wittmer

Extension of the Fuel Cost Recovery Surcharge Special Permission 28207; R-2009-2094616

Order

By the Commission:

Tristate Household Goods Conference, Inc. (Tristate), a tariff publishing agency, represents approximately 215 PUC household good carriers. Substantially large increases in the cost of diesel fuel, which were unanticipated, motivated Tristate to request the implementation of the Fuel Cost Recovery Surcharge. The Fuel Cost Recovery Surcharge Special Permission 28207 was approved in Public Meeting held April 17, 2003, and extended in subsequent Public Meetings. The extension was approved for a duration of one year unless changed, cancelled or extended. The current surcharge grants approval to temporarily increase the Tristate tariff to recover temporarily increased fuel costs when transporting household goods for moves more than 40 miles (weight and distance) and moves that are 40 miles or less (hourly) by the use of a Fuel Cost Recovery Surcharge.

NOTICES 2251

PENNSYLVANIA BULLETIN, VOL. 43, NO. 16, APRIL 20, 2013
Tristate filed a request on January 8, 2013 to permit members of its conference to continue assessing a fuel cost recovery surcharge to defray the continuing rise in costs of diesel fuel.

The surcharge is determined by a formula which attempts to approximate the amount of fuel used on a particular trip and multiplies that amount by the increased cost of fuel, allowing the carrier to recover only the additional fuel charges incurred. The formula includes the following constant factors: (1) base price per gallon of fuel; (2) average vehicle fuel consumption of 5 miles per gallon; and (3) a terminal factor which allows the carrier to recover the additional cost of fuel used in traveling to and from the carrier’s terminal to the origin point of the move. The formula also includes one variable factor, the current month’s diesel fuel price.

Moves of 40 miles or less will be divided into 4 categories according to average mileage: 5 mile average for trips ranging from 1 to 10 miles, 15 mile average for trips ranging from 10 to 20 miles, 25 mile average for trips ranging from 20 to 30 miles, and 35 mile average for trips ranging from 30 to 40 miles. An example calculation for an 8 mile move is as follows:

\[
\text{Origin of move to destination} = 8 \text{ miles}
\]
\[
\text{Terminal factor} = 5 \text{ miles average}
\]
\[
\text{Total miles} = 40 \text{ miles}
\]
\[
\text{Average miles per gallon} = 5
\]
\[
\text{Fuel used} = 9 \text{ gallons}
\]
\[
\text{DOE current Fuel Price as of 1/07/13} = $4.11
\]
\[
\text{Base fuel Price} = $1.27
\]
\[
\text{Fuel price difference} = $2.84
\]
\[
\text{Gallons X Fuel price difference} = 9 \times 2.84 = $25.56
\]

Moves of more than 40 miles will be calculated using actual mileage from the move’s origin to destination and return. An example calculation for a 100 mile move is as follows:

\[
\text{Origin of move to destination} = 100 \text{ miles}
\]
\[
\text{Empty Return (dest. to origin)} = 100 \text{ miles}
\]
\[
\text{Terminal factor} = 40 \text{ miles}
\]
\[
\text{Total miles} = 240 \text{ miles}
\]
\[
\text{Average miles per gallon} = 5
\]
\[
\text{Fuel used} = 48 \text{ gallons}
\]
\[
\text{DOE current Fuel Price as of 1/07/13} = $4.11
\]
\[
\text{Base fuel Price} = $1.27
\]
\[
\text{Fuel price difference} = $2.84
\]
\[
\text{Gallons X Fuel price difference} = 48 \times 2.84 = $136.32
\]

On January 8, 2013, Tristate filed a request to again extend the Fuel Cost Recovery Surcharge. The request was filed in response to the volatile nature of the petroleum market, which continues to produce unanticipated increases in diesel fuel prices.

In support of the request for extension, Tristate has submitted data from the Department of Energy for the Central Atlantic Region. The average price of diesel fuel for the period of January 2012 to December 2012 was $4.10 per gallon, which is a 3% increase over the previous 12-month period.

The Federal Department of Transportation has responded to the escalating fuel costs for interstate transportation by approving a fuel surcharge on a similar sliding scale. The Federal Fuel Surcharge became effective May 15, 2000 and continues in effect.

Pursuant to 66 Pa.C.S. § 1301, the Commission is required to ensure that all rates charged by a public utility are just and reasonable. Additionally, the Commission is obligated to address industry-wide problems “without creating a chaotic rate structure impossible to manage or police.” Emergency Fuel Surcharge, 47 Pa. P.U.C. 389, 391 (1974). The current surcharge addresses the problem of rising fuel costs, while being just and reasonable in that carriers are compensated only for the additional cost of the fuel used.

Based on our review, it appears that the extension of the Fuel Cost Recovery Surcharge for transportation of household goods is necessary, is an appropriate means to address this regulatory problem and will result in just and reasonable rates. In order to prevent financial hardship, it is imperative that Pennsylvania household goods carriers be afforded an opportunity to temporarily adjust rates to offset escalating fuel costs using the proposed extended Fuel Cost Recovery Surcharge and, accordingly, we shall allow the proposed extended surcharge to become effective for a period of one year unless changed, cancelled or further extended.

Therefore,

It Is Ordered That:

1. Tristate members rendering service under authority of this Commission shall charge a Fuel Cost Recovery Surcharge on transportation provided for over 40 miles charges and for 40 miles or less hourly charges in accordance with all other tariff rules of this Commission. The Fuel Cost Recovery Surcharge is to be extended effective April 18, 2013.

2. The Extended Fuel Cost Recovery Surcharge shall be in effect for one year to April 18, 2014 unless changed, cancelled or further extended by the Commission.

3. Copies of this order shall be served by the Secretary to the Office of Consumer Advocate and Office of Small Business Advocate. The Secretary shall forward this Order to the Pennsylvania Bulletin for publication.

4. Each carrier shall post a copy of this Extended Fuel Cost Recovery Surcharge along with the original Fuel Cost Recovery Surcharge dated April 17, 2003 in a conspicuous place in the office and vehicles. In addition, each carrier shall include the surcharge as a separate line item of the Estimate of Charges provided to prospective shippers and on the Bill of Lading.

5. The rates collected to the Extended Fuel Cost Recovery Surcharge are subject to refund in the event that any formal complaints are filed, within 30 days of the date of publication of this order, and are successful in challenging the surcharge.
