Maximum Lawful Rate of Interest for Residential Mortgages for the Month of November 2016

The Department of Banking and Securities (Department), under the authority contained in section 301 of the act of January 30, 1974 (P.L. 13, No. 6) (41 P.S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of November, 2016, is 4 1/2%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub.L. No. 96-221). Further preemption was instituted with the signing of Pub.L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which such individual owns and which such individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 2.00 to which was added 2.50 percentage points for a total of 4.50 that by law is rounded off to the nearest quarter at 4 1/2%.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. DEPARTMENT OF HUMAN SERVICES

Additional Class of Disproportionate Share Hospital Payments

The Department of Human Services (Department) is providing final notice of its funding allocation for Fiscal Year (FY) 2015-2016 for disproportionate share hospital (DSH) payments to qualifying acute care general hospitals that serve the indigent population of cities in this Commonwealth with a per capita income significantly below the Statewide average for the Commonwealth.

All payment limitations are applicable, including those limitations that the Commonwealth may not exceed its

aggregate annual DSH allotment, and that no hospital may receive DSH payments in excess of its hospital-specific limit. The Department will not redistribute DSH payments made under this additional class of DSH payments to qualifying hospitals as a result of a qualifying hospital exceeding its hospital-specific DSH limit.

The Department published notice of its intent to allocate funding for these DSH payments at 46 Pa.B. 1393 (March 12, 2016). The Department received no public comments during the 30-day comment period and will implement the change as described in the notice of intent.

Fiscal Impact

The FY 2015-2016 impact is \$4.145 million (\$1.989 million in State general funds).

Additional Class of Disproportionate Share Payment

The Department of Human Services (Department) is providing final notice of its funding allocation for Fiscal Year (FY) 2015-2016 disproportionate share hospital (DSH) payments to qualifying hospitals that provide a high volume of services to the Medical Assistance population to promote continued access to inpatient and ancillary outpatient services in this Commonwealth and to support academic medical programs that provide integrated patient-centered medical services. The Department is not otherwise changing the qualifying criteria or payment methodology for these payments.

All payment limitations are applicable, including those limitations that the Commonwealth may not exceed its aggregate annual DSH allotment, and that no hospital may receive DSH payments in excess of its hospital-specific limit.

The Department published notice of its intent to allocate funding for these payments at 46 Pa.B. 2740 (May 28, 2016). The Department received no comments during the 30-day comment period and will implement the changes as described in the notice of intent.

Additional Disproportionate Share Hospital Payment

The Department of Human Services (Department) is providing final notice of its funding allocation for Fiscal Year (FY) 2015-2016 for disproportionate share hospital (DSH) payments to certain Medical Assistance (MA) acute care general hospitals, which in partnership with an independent facility listed as a Cleft and Craniofacial Team by the America Cleft Palate-Craniofacial Association, provide surgical services to patients with cleft palate and craniofacial abnormalities. The Department is funding these DSH payments to promote continued access to inpatient hospital services for MA eligible and uninsured persons with cleft palate and craniofacial abnormalities. The Department is not otherwise changing the qualifying criteria or payment methodology for these payments.

All payment limitations are applicable, including those limitations that the Commonwealth may not exceed its aggregate annual DSH allotment, and that no hospital may receive DSH payments in excess of its hospital-specific limit.

DEPARTMENT OF TRANSPORTATION

Findings

Under section 2002(b) of The Administrative Code of 1929 (71 P.S. § 512(b)) establishing the Department of Transportation (Department), the Director of the Bureau of Project Delivery, as delegated by the Secretary of Transportation, makes the following written finding:

The Department is planning the following listed projects. Environmental and Section 4(f) Documentation have been developed for the following identified projects to evaluate the potential environmental impacts caused by these projects. The Section 4(f) documents also serve as the Section 2002 Evaluation. The approved documents are available in the CE/EA Expert System at <http://www.dotdom2.state.pa.us/ceea/ceeainmain.nsf>. The environmental, economic, social and other effects of the proposed projects have been considered. Based upon studies, there is no feasible and prudent alternative to the use of the Section 2002 resources for the proposed identified projects, and all reasonable steps have been taken to minimize the effects.

• **SR 0144, Section A03—Bellefonte Borough, Centre County.**

Project Description: The proposed project involves the installation of a retaining wall to stabilize the roadway along a portion of Linn Street. The scope of work also includes reconstruction of the roadway, guiderail and drainage improvements, replacement of the existing handrail along Linn Street and repairs to the handrail along SR 150 (South Water Street).

Environmental Documents: BRPA CE, approved on February 24, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Public Parks, Recreation Areas, Wildlife and/or Waterfowl Refuges, State Forest Land and State Game Land approved on February 9, 2016.

Proposed Use of Section 4(f) Resource: This project will require a drainage easement totaling 0.052 acre from land owned by the Fish and Boat Commission (Commission). The property, currently used by fishermen and boaters to access and use Spring Creek, includes a small walking path providing access from a parking lot to an adjacent property. During construction, the path will remain open at all times to provide access to Spring Creek. The drainage easement will be maintained and operated by the Department so that the area remains fully functional for fishing and boating. The remainder of the project is a retaining wall installation and handrail repairs that are located within the Bellefonte Historic District. As all work will be done within the existing right-of-way (ROW) and no land is required for this portion of the project, District cultural resource profes-

sionals have cleared this project as having no adverse impacts to the historical district.

• **SR 0230, Section 030—Elizabethtown Borough, Lancaster County.**

Project Description: The proposed project involves the replacement of the superstructure of the SR 0230 Bridge (North Market Street) over Conoy Creek. Additional work includes repairs to the existing abutments, an overlay of the approaches and minimal full-depth pavement replacement at the abutments.

Environmental Documents: Level 2 CE, approved on March 8, 2016, and a Nationwide/Programmatic Section 4(f) Evaluation for Projects that Necessitate the Use of Historic Bridges approved on October 13, 2013.

Proposed Use of Section 4(f)/2002 Resource: The Market Street Bridge, constructed in 1911, is eligible for listing in the National Register of Historic Places (NRHP) for its early and complete exemplification of the T-beam bridge technology. The Elizabethtown Historic District is considered eligible for listing on the NRHP for its representation of a mid-19th through early-20th century community and the architecture within the district. Though not explicitly identified as a contributing resource, the Market Street Bridge is considered to be a contributing feature of the Elizabethtown Historic District. The bridge cannot be rehabilitated to meet the Secretary of Interior's Standards for Rehabilitation. The Pennsylvania Historical and Museum Commission concurred on this finding, and the project will have the result of an adverse effect to both the bridge and the Elizabethtown Historic District. Mitigation measures include context sensitive design including an open railing on the parapet walls of the replacement bridge improving the visibility of the creek and adjacent historic properties. An architectural walking tour of the Elizabethtown Historic District will also be developed, which will include bridges within the historic district and historic and current photos of the North Market Street Bridge.

• **SR 0372, Section 000—Christiana Borough, Lancaster County.**

Project Description: The proposed project involves the replacement of the SR 0372 (Water Street) Bridge over Williams Run. The proposed project will replace the deteriorating structure, update guiderail, improve drainage, and mill and overlay the approaches. Minor profile adjustments along the roadway approaches are anticipated.

Environmental Documents: Level 1b CE, approved on February 9, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Public Parks, Recreation Areas, Wildlife and/or Waterfowl Refuges, State Forest Land and State Game Land approved on January 14, 2016.

Proposed Use of Section 4(f)/2002 Resource: The Christiana Borough South Park is a community park located adjacent to the east side of the project area. The new bridge will require approximately 0.21 acre of ROW from the park to accommodate bridge and roadway widening, drainage improvements and the wing walls. The portion of the park that will be affected by the project will be directly around the existing bridge in an area of grassy maintained lawn. The project will not affect any activities, features or attributes of the park that qualify it for protection, and access to the park will not be affected.

• **SR 0512, Section 03B—Bushkill Township, Northampton County.**

Project Description: The proposed project involves the replacement of the SR 0512 Bridge over Bushkill Creek. The proposed project also includes updates to guiderail, improved drainage and approach work. Minor profile adjustments along the roadway approaches are anticipated.

Environmental Documents: BRPA CE, approved on March 4, 2016, and a determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Historic Properties approved on January 19, 2016.

Proposed Use of Section 4(f)/2002 Resource: The Kaske Farm is eligible for listing in the NRHP for its representation of regional agricultural change during the period of diversified grain and livestock farming. The proposed project will require the acquisition of approximately 0.11 acre of ROW within the NRHP boundary of the Kaske Farm to accommodate bridge and roadway widening and the wing walls. There will be no adverse effects to this resource as a result of this project.

• **SR 0743, Section 028—Derry Township, Dauphin County.**

Project Description: The proposed project involves the replacement of the SR 0743 (Park Avenue) Bridge over Spring Creek. The project also includes approach roadway work, drainage upgrades and curb ramp installation.

Environmental Documents: Level 2 CE, approved on March 3, 2016, and a Nationwide/Programmatic Section 4(f) Evaluation for Projects that Necessitate the Use of Historic Bridges approved on February 17, 2016.

Proposed Use of Section 4(f)/2002 Resource: The Park Avenue Bridge (SR 0743) over Spring Creek was determined eligible for listing in the NRHP for its engineering and architectural representation of a standard T-beam bridge design. The Park Avenue Bridge is in poor condition and, due to its age, will continue to require repairs on a more frequent basis. The required repairs cannot be done without impacting the historical integrity of the bridge. The needed deck replacement and widening both dictate removal of character-defining features of the bridge and would result in an adverse effect. Based on these findings, the bridge will be reconstructed incorporating context sensitive design into the proposed bridge focusing on the parapets and end walls. Funding will also be provided to the Hershey Derry Township Historical Society to support the digitization and integration of select images relating to Derry Township's Transportation History to its current web site.

• **SR 0869, Section 000—Pavia Township, Bedford County.**

Project Description: The proposed project involves the replacement of the SR 0869 (Burnt House Road) Bridge over Bobs Creek. The proposed project also includes updating guiderail, improving drainage, and milling and overlaying the approaches. Minor profile adjustments along the roadway approaches are anticipated.

Environmental Documents: BRPA CE, approved on January 19, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Historic Properties approved on January 12, 2016.

Proposed Use of Section 4(f)/2002 Resource: The Ickles-Corle Farm is eligible for listing in the NRHP for its agricultural significance. The farm is located in the northeast quadrant of the project area and permanent

ROW acquisition totaling 0.06 acre are required from the property. There will be no adverse effects to the resource as a result of this project.

• **SR 1059, Section 001—East Cocalico Township, Lancaster County.**

Project Description: The proposed project involves the rehabilitation of the SR 1059 (South Muddy Creek Road) Bridge over Little Muddy Creek. The work will include superstructure replacement, approach roadway paving and some safety improvements including updated guide rail.

Environmental Documents: BRPA CE, approved on March 3, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Historic Properties approved on February 8, 2016.

Proposed use of Section 4(f)/2002 Resource: The Fry-Lesher-Lausch Farm is eligible for listing in the NRHP for its significance in agriculture from 1870 to 1960. It is located in the northeast quadrant of the project area. This project will require approximately 0.006 acre (275 square feet) of permanent ROW acquisition from the Fry-Lesher-Lausch Farm. There will be no adverse effects to this resource as a result of this project.

• **SR 2004, Section B08—New Sewickley Township, Beaver County.**

Project Description: The proposed project involves the realignment of a portion of SR 2004 (Freedom-Crider Road). The project will consist of reconstructing T-575 (Crows Run Road) and relocating SR 2004 to follow the T-575 corridor. This project includes construction of new and replacement structures over Crows Run Stream and its tributaries, realignment of portions of Romigh Road and Park Quarry Road (T-606), reconstruction of intersections and a portion of SR 0065, and replacement of guide rail, drainage and signing.

Environmental Documents: Level 2 CE, approved on March 24, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Historic Properties both approved on October 13, 2015.

Proposed Use of Section 4(f)/2002 Resource: The House of Mercy Lutheran Church, built in 1878, is a 1 1/2 story frame country Gothic Revival style church. The House of Mercy Lutheran Church was determined to be eligible for NRHP listing as an example of Gothic Revival ecclesiastical architecture. An approximate 0.03 acre of permanent ROW are required from within the boundary of the House of Mercy Lutheran Church for proposed drainage improvements. The acquisition of property will not physically impact the church building, nor will it alter the characteristics of the House of Mercy Lutheran Church that qualify it as eligible for the NRHP.

• **SR 2013, Section 005—Springettsbury Township, York County.**

Project Description: The proposed project involves the replacement of the existing bridge structure carrying SR 2013 (Old Orchard Road) over an unnamed tributary to Kreutz Creek. Minor approach work and guiderail updates are also included.

Environmental Documents: BRPA CE, approved on February 9, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Public Parks, Recreation Areas, Wildlife and/or Waterfowl Refuges, State Forest Land and State Game Land approved on August 19, 2015.

Proposed Use of Section 4(f)/2002 Resource: Stonewood Park is a public park owned and maintained by Springettsbury Township. A basketball court, playground, picnic pavilion and multipurpose field are all situated at the north end of the park to the west of the tributary to Kreutz Creek. The bridge replacement project is at the southeastern corner of the park and requires a minor ROW acquisition totaling 0.08 acre to the north of the bridge, which is necessary to accommodate the new bridge structure and guiderails. The park will not be adversely affected due to this project.

• **SR 2026, Section 000—Franklin Township, Greene County.**

Project Description: The proposed project involves the replacement of the SR 2026 (Rolling Meadows Road) Bridge over Coal Lick Run. The project also includes guiderail updates, drainage improvements, and the mill and overlay of the approaches. Minor profile adjustments along the roadway approaches are anticipated.

Environmental Documents: BRPA CE, approved on February 1, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Historic Properties both approved on January 29, 2016.

Proposed Use of Section 4(f)/2002 Resource: Green Hills Farm is listed in the NRHP for its significance as a late example of the Georgian style in a rural area and as an example of adaptive reuse of a large private dwelling. The property consists of a circa-1861 dwelling that was converted to a dormitory for the county's indigent, agricultural outbuildings from the 19th century, and buildings built or relocated to the property after 1973. The proposed project will require permanent acquisition of approximately 0.005 acre of additional ROW within the NRHP boundary of the Green Hills Farm to accommodate any bridge and roadway widening and the wing walls. There will be no adverse effects to the resource as a result of this project.

• **SR 3008, Section A01—Upper St. Clair Township, Allegheny County.**

Project Description: The proposed project involves the replacement of the T-460 (Morrow Road) Bridge over McLaughlin Run. The project also includes guiderail updates, drainage improvements, and the mill and overlay of the approaches. Minor profile adjustments along the roadway approaches are anticipated.

Environmental Documents: BRPA CE, approved on February 9, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Public Parks, Recreation Areas, Wildlife and/or Waterfowl Refuges, State Forest Land and State Game Land approved on January 27, 2016.

Proposed Use of Section 4(f)/2002 Resource: The Upper Saint Clair Municipal Park consists of approximately 29.75 acres of recreational space managed for conservation, education and recreation purposes. It includes an administration building, Veterans Park, Founders Field, Marmion Field, township tennis facility, three-hole golf course, community activity center, basketball courts, and a new playground and picnic area. Upper St. Clair Township has recently adopted a Comprehensive Plan (2015—2025), which defines the park as a valuable recreational feature of the community. Approximately 0.065 acre of permanent ROW will be required for this project. There will be no adverse effects to the park as a result of this project.

• **SR 4001, Section 004—Cummings Township, Lycoming County.**

Project Description: The proposed project involves the reconstruction of the SR 4001 (Little Pine Creek Road) Bridge over Love Run and includes minor approach work.

Environmental Documents: BRPA CE, approved on February 5, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Public Parks, Recreation Areas, Wildlife and/or Waterfowl Refuges, State Forest Land and State Game Land approved on December 17, 2015.

Proposed Use of Section 4(f)/2002 Resource: The project will require approximately 0.1 acre of permanent ROW acquisition from Little Pine State Park. The park surrounds the project area and the required ROW will be taken from all four quadrants to allow for a wider bridge and future maintenance access. None of the features, qualities or attributes of the park that qualify it for protection will be permanently impacted.

• **SR 4003, Section 150—Brady's Bend Township, Armstrong County.**

Project Description: The proposed project involves the replacement of the SR 4003 (Seybertown Road) Bridge over Sugar Creek.

Environmental Documents: Level 1b CE, approved on January 5, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse Use Public Parks, Recreation Areas, Wildlife and/or Waterfowl Refuges, State Forest Land and State Game Land approved on January 5, 2016.

Proposed Use of Section 4(f)/2002 Resource: The Brady's Bend Access Area is a recreational boat launch facility and associated parking area, which provides public access to the Allegheny River. It is owned and maintained by the Commission. Approximately 0.02 acre of permanent ROW and 0.008 acre of permanent slope easement are required from the access area. The acquisition of this land will not change the qualities, activities, features or attributes of the Commission property.

• **SR 4032, Section P30—Sewickley Heights Borough, Allegheny County.**

Project Description: The proposed project involves the replacement of the SR 4032 (Fern Hollow Road) Bridge over Little Sewickley Creek. The project also includes guiderail updates, drainage improvements, and the mill and overlay of the approaches. Minor profile adjustments along the roadway approaches are anticipated.

Environmental Documents: BRPA CE, approved on January 8, 2016, and a Determination of Section 4(f) De Minimis Use Section 2002 No Adverse use Public Parks, Recreation Areas, Wildlife and/or Waterfowl Refuges, State Forest Land and State Game Land approved on December 23, 2015.

Proposed use of Section 4(f)/2002 Resource: Sewickley Heights Borough Park consists of approximately 1,200 acres of forests and undeveloped fields managed for conservation, education and recreation purposes. There are no existing or planned facilities within the project study area as the intent of the park is the nature experience and is used by hikers, bikers and equestrians. Approximately 0.043 acre of permanent ROW acquisition is required from the park. The area is not heavily used and does not contain any trails or formal recreation areas. The minimal amount of required ROW needed for this project will not reduce the value of the park property.

• **SR 7203, Section BR—Blacklick Township, Indiana County.**

Project Description: The proposed project involves the replacement of the T-460 (Aultmans Run Road) Bridge over Aultmans Run.

FISH AND BOAT COMMISSION

Additions to List of Class A Wild Trout Waters

The Fish and Boat Commission (Commission) approved the addition of four stream sections to its list of Class A Wild Trout Streams as set forth at 46 Pa.B. 4027 (July 23, 2016). Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource and to conserve that resource and the angling that it provides. Class A wild trout

populations represent the best of this Commonwealth's naturally reproducing trout fisheries.

Application for Permit for Use of Explosives; Lake Erie, Erie County

The Executive Director of the Fish and Boat Commission (Commission), acting under the authority of 30 Pa.C.S. § 2906 (relating to permits for use of explosives), may grant permits for the use of explosives in waters for engineering purposes. The Commission's regulations at 58 Pa. Code Chapter 51, Subchapter E (relating to permit procedures) establish the agency practices and procedures to be followed in consideration and disposition of applications for permits, the granting or denial of which is discretionary, including permits issued under section 2906. Under 58 Pa. Code § 51.43 (relating to staff review), Commission staff will administratively review all applications filed with the Commission, and if Commission staff find after the administrative review that the proposed permitted activity creates a substantial likelihood of significant adverse impacts on fish, fishing, fish habitat, boating or other matters within the cognizance of the Commission as a trustee of the Commonwealth's environment, Commission staff will defer action on the application until after publication of a notice in the *Pennsylvania Bulletin* under 1 Pa. Code § 35.105 (relating to notice of nonrulemaking proceedings).

The Commission received an application for a permit for use of explosives from ITC Lake Erie Connector, LLC. ITC Lake Erie Connector, LLC proposes to construct the Lake Erie Connector Project, an approximately 72.4 miles of high-voltage direct current bidirectional electric transmission interconnection to transfer electricity between Canada and the United States through a submarine transmission cable across Lake Erie. Due to bedrock, approximately 1 mile of the trench for the cable installation across Lake Erie will be excavated by confined stemmed blasting. Blasting can cause mortality, physical injury, auditory tissue damage, permanent and temporary threshold shifts, behavioral changes, and decreased egg and larvae viability. Based on the setback calculation for this project, the extent for the potential for lethal impacts is limited to 63.3 feet from the blast location.

Based on their administrative review of the permit application, Commission staff have found that the proposed permitted activity creates a substantial likelihood of significant adverse impacts on fish, fishing, fish habitat, boating or other matters within the cognizance of the Commission. Commission staff therefore invite the public to submit comments regarding the ITC Lake Erie Connector, LLC's application for permit for use of explosives in Commonwealth waters and the Lake Erie Connector Blasting Impact Analysis in United States Waters November 2015, which can be viewed at <http://pfbc.pa.gov/LakeErieConnector-Permit.pdf> and <http://pfbc.pa.gov/LakeErieConnector-Blasting.pdf>, respectively. Commentators should include their name, address and telephone number and a concise statement to inform the Commission of the exact basis of their comment and the relevant facts upon which it is based.

Interested persons are invited to submit written comments, objections or suggestions about the proposed project to the Executive Director, Fish and Boat Commission, P.O. Box 67000, Harrisburg, PA 17106-7000, within 30 days after publication of this notice in the *Pennsylvania Bulletin*. Comments submitted by facsimile will not be accepted.

Comments also may be submitted electronically by completing the form at www.fishandboat.com/regcomments. If an acknowledgment of electronic comments is not received by the sender within 2 working days, the comments should be retransmitted to ensure receipt. Electronic comments submitted in any other manner will not be accepted.

Classification of Wild Trout Streams; Additions and Revisions

The Fish and Boat Commission (Commission) approved the addition of 99 new waters to its list of wild trout streams and the revision of the section limits of 1 stream already on the list as published at 46 Pa.B. 4022 (July 23, 2016). Under 58 Pa. Code § 57.11 (relating to listing of wild trout streams), it is the policy of the Commission to accurately identify and classify stream sections supporting naturally reproducing populations of trout as wild trout streams. The listing of a stream section as a wild

trout stream is a biological designation that does not determine how it is managed. The Commission relies upon many factors in determining the appropriate management of streams. The Commission's Fisheries Management Division maintains the complete list of wild trout streams and it is available on the Commission's web site at http://www.fish.state.pa.us/trout_repro.htm.

INDEPENDENT REGULATORY REVIEW COMMISSION

Notice of Comments Issued

Section 5(g) of the Regulatory Review Act (71 P.S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b).

The Commission has issued comments on the following proposed regulation. The agency must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

Environmental Quality Board Regulation # 7-498 (IRRC # 3153)

Radiological Health and Radon Certification Fees; Pennsylvania Radon Mitigation System Tag

September 29, 2016

We submit for your consideration the following comments on the proposed rulemaking published in the July 2, 2016 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (RRA) (71 P.S. § 745.5b). Section 5.1(a) of the RRA (71 P.S. § 745.5a(a)) directs the Environmental Quality Board

(EQB) to respond to all comments received from us or any other source.

Economic or fiscal impact; Adverse effects on prices of goods and services; Protection of the public health, safety and welfare.

While we recognize that Section 8 of the Radon Certification Act (act) (63 P.S. § 2008) requires that the Department of Environmental Protection (Department) establish a fee schedule to cover the costs of the certification programs established in the act, and Section 401 of the Radiation Protection Act (35 P.S. § 7110.401) contains a similar requirement, commentators oppose the significant

fee increases proposed in this regulation. Several commentators suggest that the Department should minimize expenses before imposing higher costs on the regulated community. Others indicate that the industry's increased costs will be passed on to consumers, which may result in fewer people testing and mitigating their homes.

Has EQB evaluated whether increased costs for radon testing and mitigation could lead to a decline in radon testing and/or mitigation overall? We ask EQB to address in the Preamble of the final regulation its consideration of any negative impact that increased fees could have on efforts to protect the public from radon. Also, EQB should explain what has been done to reduce expenses and improve efficiency to the greatest extent possible in order to reduce the fiscal impact on the regulated community.

Additionally related to fees, in response to Regulatory Analysis Form question # 29, EQB anticipates the promulgation, effective and compliance dates for the final-form regulation to be Quarter 2, 2017. We note that the Radiation Protection Program Three-Year Regulatory Fee and Program Cost Analysis Report to the EQB shows that proposed increased fees were expected to begin in 2016-17. Given the discrepancy between these dates, we ask EQB to provide updated information in the Preamble of the final-form regulation regarding projected program costs and revenue.
