DEPARTMENT OF AGRICULTURE

Agricultural Research Project Contractors

The Department of Agriculture (Department) is soliciting applications to conduct agricultural research on one or more of the following research topic areas, with the research to be conducted from July 1, 2017, to June 30, 2018, with the possibility (but not the assurance) of extending that research into subsequent years.

This notice establishes the procedures by which grant applications will be solicited and reviewed, and by which grants will be awarded.

1. *Grant Solicitation.* The Department will be accepting grant applications for the purposes, in the form and according to the schedule set forth as follows. Additional publication and dissemination of this notice shall be made to applicants who have previously submitted grant applications to or received grants from the Department as well as any individuals or entities who have requested notification from the Department of grant availability.

2. *Research Topic Areas.* The research topics the Department is interested in funding are as follows:

a. *Ongoing Multiyear Research Projects.* The Department has, in previous years, provided funding for various multiyear research projects that might be continued or extended to complete research the Department identifies as addressing continued priorities of the agricultural industry. The Department will consider proposals to continue supporting previously funded research.

b. *Spotted Lanternfly.* Spotted lanternfly, *Lycorma delicatula*, was detected in this Commonwealth 3 years ago, and quickly established itself as a damaging pest in neighborhoods, forests and agricultural settings. As with any new invasive species, significant knowledge gaps exist in understanding of the pest and its potential effects on this Commonwealth. The Department will consider

research proposals that address basic and applied research on spotted lanternfly, with priority given to proposals that analyze the pest's economic impacts on agriculture, general commerce and communities, on integrated pest management strategies for agricultural commodities of importance to this Commonwealth and on basic biological research that will allow us to develop more sophisticated, cost-effective and environmentally-low-impact control strategies.

c. *Farm Safety.* There is an extant body of research on the efficacy of practices and technologies to preserve the safety of farmers engaged in production agriculture. Despite this knowledge, adoption of these practices and technologies remains limited, threatening the lives and livelihoods of farmers. The Department will accept research proposals for a behavioral study of what makes a farmer more or less likely to make the rather modest investment in farm safety practices and technologies, with the objective of finding what messages do and do not resonate with the target audience and spur a farmer to action.

d. *Farmland Preservation.* Over the past three decades, the Commonwealth has invested approximately \$1.5 billion to protect from the prospect of development high-value farmland for agricultural production in perpetuity. Ten years ago a study indicated that farmland contributes far more in tax dollars than it demands in services, unlike residential land which generally demands more in services than it contributes in tax dollars. New contemporary research is needed to update this understanding of the return on investment in the public's support for farmland preservation programs. The Department seeks research proposals for projects that quantify this return, as well as the direct and indirect economic contribution of preserved farms to this Commonwealth's economy, and the actual and avoided public service costs for preserved land compared to developed tracts.

e. *Banking and Market Development.* Access to capital is often cited as a challenge for those in production agriculture, yet there is a dearth of research as to the accessibility to debt financing among the agriculture industry and different geographic regions of this Commonwealth. The Department seeks research proposals to assess the current lending environment in the farming industry in this Commonwealth. Proposals should attempt to quantify total loan originations, total loan volume, operating loans as percent of total nonreal estate loans and delinquency rates, among other factors. Research proposals should also seek to identify: differences in loan activity and performance between counties or regions, or both, of this Commonwealth; factors influencing loan repayments; what barriers exist to accessing financial capital; and whether particular counties or regions of this Commonwealth are underserved by financial service providers and products.

f. *Workforce Development.* Developing a workforce development plan specific to agriculture is a priority of the Department. Initial research suggests nearly 75,000 employment vacancies will occur over the next decade within this Commonwealth's agriculture and food industries. The Department is interested in finding ways to increase the education and training opportunities in the industry for people who are high school graduates, but do not wish to participate in post-secondary education. The Department seeks proposals from entities from within or that support

the agriculture and food industry to design and implement micro-credentials or badges that teach specific skills that are not a part of the formal education systems. Interested parties will use a specific format for credential development provided by the Department. Mini-grants not to exceed \$2,500 will be used to support development efforts and the process that will be used to evaluate the efficacy of the credential.

g. Agricultural Environmental Solutions. This Commonwealth has a distinct and immediate opportunity to make a lasting positive impact on water quality within this Commonwealth and greater Chesapeake Bay (Bay) Watershed. With over 15,000 miles of streams and rivers, the Commonwealth provides 50% of the freshwater to the Bay annually, and over 90% of the freshwater to the upper Bay. These streams and rivers also provide critical recreational and drinking water sources within this Commonwealth. Within the Bay Watershed portion of this Commonwealth are approximately 34,000 small farms under 150 acres in size. These farms contribute strongly to this Commonwealth's economy as well as the nutrient load in Commonwealth waters and to the Bay. The Department will accept research proposals that: introduce new methods and technology for cost-effective total maximum daily load reduction for nutrient waste streams amongst farms in the Bay Watershed; or introduce the drying and pelletizing of chicken manure as a best practice in sustainable farm management and proving an economically viable approach by creating a flexible pelletizing service.

h. Hydroponics and Aquaponics. Within this Commonwealth, hydroponics and aquaponics systems have been recognized as an excellent way to teach science, technology, engineering and math knowledge and skills and as technology cluster that can support additional economic development in the food sector. The Department is interested in supporting action research where a hydroponics and aquaponics practitioner and an academic researcher collaborate on research that can solve practical problems experienced by these operations. Mini-grants of no more than \$5,000 will be awarded to address issues such as, but not limited to, bringing production to a larger scale, lighting, nutrient solutions, integrated pest management and integration into broader market structures. The practitioner needs to apply the research-based solution and report their results for inclusion on a public database as a part of the project.

i. Urban Agriculture. Urban agriculture and intensive agriculture practices have grown exponentially across this Commonwealth in recent years. There are hundreds of projects operating in this Commonwealth's urban centers. The Department will accept proposals for research projects supported by mini-grants of no more than \$5,000 where an urban agriculture practitioner and an academic researcher collaborate to solve a problem related to urban agriculture practice. Topics may include, but are not limited to, season extension, soil testing and remediation, intensive farming, production of new crops, adding value through canning and other forms of preservation, and new distribution and marketing processes. The practitioner needs to apply the research-based solution and report their results for inclusion on a public database as a part of the project.

j. Avian Vaccinations. Avian influenza—both the low-pathogenic and high-pathogenic forms—is a top-of-mind concern for the poultry industry. The 2015 outbreak of high-pathogenic avian influenza decimated Midwestern United States poultry operations. Marek's disease, which

appeared to be well controlled for decades, has once again begun to plague the poultry layer industry. Much work remains to be done to develop vaccines to protect birds and the industry. The Department will accept proposals that seek to research the efficacy of various vaccines available in the United States and international markets, particularly those that study the in ovo application of vaccines.

3. Grant Agreement. The terms and conditions of the grant will be governed by a grant agreement between the Department and the applicant which shall be tendered to the applicant for execution, returnable in no more than 30 days.

4. Application Delivery and Deadline. Interested applicants must deliver a complete research project proposal and grant application to the Department by 4 p.m. on Friday, January 26, 2018, if hand-delivered, or by mail post-marked on or before that same date. Applications should be addressed and delivered to the Department of Agriculture, ATTN: Michael Smith, Executive Deputy Secretary, 2301 North Cameron Street, Harrisburg, PA 17110.

5. Format of the Project Proposal and Grant Application. The project proposal and grant application shall be formatted as follows:

a. A cover page, titled Agricultural Research Project Proposal and Grant Application, providing: i) the title of the proposed project; ii) the name and address of the applicant; iii) the name, address, telephone number and e-mail address of the applicant's principal contact person for matters relating to the application; and iv) the total maximum grant amount sought for the proposed project.

b. Section 1, titled Statement of Purpose, explaining or presenting: i) the purpose for which the grant funds would be utilized; ii) how the project aligns with one or more of the research topics presented in Paragraph No. 2; iii) details of the proposed project, including a statement of expected impact of outcomes, staffing for the project, and objectives and methodologies.

c. Section 2, titled Statement of Need, explaining the need for the grant funds sought, and identifying the presence of any additional funding partners and the extent of that funding.

d. Section 3, titled Budget, presenting a detailed budget for the proposed project.

e. Section 4, titled Criteria for Measuring Outcomes, identifying methods for measuring outcomes.

f. Section 5, titled Industry Involvement, describing the extent of any support, participation and funding from agricultural industry, including any written confirmation of that support, participation or funding.

6. Scoring of Applications. The Department will evaluate each complete and timely-filed project proposal and grant application it receives, using a 100-point scale assessing:

a. up to 10 points for the research project needs statement.

b. up to 15 points for the impact of research outcomes.

c. up to 5 points for the presence of additional funding partners.

d. up to 30 points for the research methodology.

e. up to 20 points for project evaluation and replicability.

f. up to 20 points for support and participation from industry.

7. *Scores.* Upon completion of evaluations, the Department will prepare a record identifying each complete and timely-filed project proposal and grant application received and the numerical score assigned to each. The Department shall award grants based upon its evaluation and scoring.

8. *Multiyear Projects or Extensions.* The Department may award grant funding for multiyear projects or extensions of an ongoing project, if the Department identifies that a multiyear term or an extension advances the grant's objectives. Requests for extensions of ongoing projects shall be made, evaluated and processed in accordance with all the requirements of this notice.

9. *Notice of Award.* Applicants shall be notified by mail of the decision on their grant applications by the Department. Best efforts will be made to do so within 15 days of the application deadline.

10. *Grant Agreement.* With the mailed grant award notice, the Department will provide applicants with a grant agreement for execution and return within 30 days. The Department will obtain the required Commonwealth signatures on the grant agreements and return a copy of

the fully-executed grant agreement to the applicant. No grant agreement is effective and work should not commence until all required signatures have been applied to the grant agreement. Among the terms of the grant agreement shall be a requirement that the grant recipient provide the Department full and complete access to all records relating to the performance of the project and submit such information as the Department may require.

11. *Nonmatching Cost-Reimbursable Grant.* Grants made hereunder do not require the applicant secure or devote a matching sum to the project. Payment of grant funds will occur on a reimbursement basis, with an advance payment option.

12. *Reporting Requirements.* Upon completion of research projects funded through this program, grant recipients will submit to the Department within 60 days a final report detailing the nature of the questions under study, an explanation of the research design and methods, findings of the research and recommendations for future study.

AIR QUALITY PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation

to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

09-0048E: H&K Materials/Chalfont Batch Asphalt Plant (300 Skunk Hollow Road, Chalfont, PA 19474) a plan approval for the modification of an existing VOC emission restriction of the Batch Asphalt Plant located in Hilltown Township, **Bucks County**. The increase in the VOC emission restriction from 0.022 lb/ton to 0.029 lb/ton (4.34 tons/year to 5.73 tons/year) is resulting from a performance test conducted in June 2017 to re-establish the limit in the facility's State Only Operating Permit, 09-00048. This plan approval does not authorize any physical changes to the Batch Asphalt Plant nor does it alter any previously approved emission restrictions on other pollutants. This plan approval does not re-establish Best Available Technology of the source. The plan approval includes monitoring, record keeping, and reporting requirements designed to address all applicable air quality regulations.

06-03089C: H & K Group, Inc. (1 Quarry Road, Douglassville, PA 19518) for the construction of a diabase stone crushing plant to replace the current stone crushing plant at the Douglassville Quarry located in Douglass Township, **Berks County**. Wet suppression will control the PM emissions. The expected facility potential emissions as a result of the changes proposed are: 40.2 tpy PM and 14.1 tpy PM₁₀. The facility is a State Only facility. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12, and 40 CFR Part 60, Subpart OOO, Standards of Performance for Nonmetallic Mineral Processing Plants. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

Noncoal Applications Received

Effluent Limits—The following effluent limits will apply to NPDES permits issued in conjunction with a noncoal mining permit:

Parameter	Table 2

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

Parameter	30-Day Average	Daily Maximum	Instantaneous Maximum
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	

Alkalinity greater than acidity*

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Extension of Availability of Rebates through the Pennsylvania Alternative Fuel Vehicle Rebate Program

The Department of Environmental Protection (Department) announces the continued availability of grants to Commonwealth residents under Pennsylvania's Alternative Fuel Vehicle (AFV) Rebate Program (Program). The Program, administered by the Department through the Alternative Fuels Incentive Grant (AFIG) Program, provides rebates to Commonwealth residents to assist individuals with the incremental costs of purchasing an AFV.

To qualify for the rebate, the AFV must be registered and primarily operated in this Commonwealth. The rebate will be offered on a first-come, first-served basis in the order in which applications are received. Rebate request forms and required documentation must be submitted to the Department no later than 6 months after the vehicle is purchased.

All AFV rebates must be submitted online using the eGrants system. To submit an application, visit <https://www.esa.dced.state.pa.us/Login.aspx>.

The highlights of the Program are as follows:

- The purchase price of any vehicle eligible for a rebate must be less than \$50,000.
- A \$1,750 rebate for battery electric vehicles (BEV) and plug-in hybrid electric vehicles (PHEV) with a battery capacity greater than or equal to 20 kWh.
- A \$1,000 rebate for BEVs and PHEVs with a battery capacity between 10 kWh and 20 kWh.
- A \$750 rebate for BEVs and PHEVs with a battery capacity less than 10 kWh.
- In addition to rebates for new AFVs, one-time preowned AFVs with 75,000 miles or less and a true market value of \$50,000 or less will be eligible to receive a rebate if they meet one of the two following conditions:

1. The resident receiving the rebate must register the one-time preowned vehicle at an address within an air quality nonattainment area for ozone within Allegheny, Armstrong, Bucks, Butler, Chester, Delaware, Montgomery, Philadelphia, Washington and Westmoreland Counties.

2. The resident receiving the rebate must register the one-time preowned vehicle at any address in this Commonwealth and must have a household income that is below 200% of the Federal Income Poverty level, as defined by the United States Department of Health and Human Services (<https://aspe.hhs.gov/poverty-guidelines>). Commonwealth residents who apply for a rebate under this condition will be required to report and verify all earned and unearned income with their application for determining eligibility. A valid source of income verification may include Federal or State tax returns. Verification documents must be included when submitting the rebate request form.

Approximately 500 rebates at all levels will be available. The Program will be offered until the AFIG Program moneys are exhausted and will be reassessed on June 30, 2018.

The Program guidelines, application instructions and rebate availability can be accessed at <http://www.dep.pa.gov> (select "Citizens," then "Grants, Loans and Rebates," then "Alternative Fuels Incentive Grant," then "Alternative Fuel Vehicles"). Unemployment Compensation; Table Specified for the Determination of Rate and Amount of Benefits

The purpose of this notice is to announce the Table Specified for the Determination of Rate and Amount of Benefits (Table) and the maximum weekly benefit rate for 2018.

The Table, in section 404(e)(1) of the Unemployment Compensation Law (law) (43 P.S. § 804(e)(1)), was amended by the act of November 3, 2016 (P.L. 1100, No. 144) (Act 144). Under sections 14 and 15 of Act 144, the amended Table was effective November 3, 2016, and applies to benefit years that begin after December 31, 2016.

As enacted, the amended Table establishes a maximum weekly benefit rate of \$561. Section 404(e)(2) of the law provides that the Table shall be extended or contracted annually to the point where the maximum weekly benefit rate for a calendar year equals 66 2/3% of the average weekly wage for the 36-month period ending on the previous June 30. However, section 404(e)(2)(iii) of the law, as amended by Act 144, contains limitations on the growth of the maximum weekly benefit rate. Section 404(e)(2)(iii) provides that the maximum weekly benefit rate for 2017 through 2019 may not exceed \$561. Therefore, the Department of Labor and Industry is not extending the Table for 2018, and the maximum weekly benefit rate will remain at \$561.

The Table, as amended by Act 144, was published at 47 Pa.B. 362 (January 21, 2017) and is codified in 34 Pa. Code Chapter 65, Appendix A (relating to table specified for the determination of rate and amount of benefits). Under section 201(a) of the law (43 P.S. § 761(a)), section 404(e)(2) of the law and 34 Pa. Code § 65.111 (relating to benefit table), the Table in 34 Pa. Code Chapter 65, Appendix A is being adopted by this notice for 2018.

Questions concerning this notice should be directed to Robert V. O'Brien, Executive Deputy Secretary, Department of Labor and Industry, Labor and Industry Building, 651 Boas Street, Harrisburg, PA 17121.

Acting Secretary
