§ 633c.1. Perfect Pairs wager.

(a) The layout for a Blackjack table shall be submitted to the Bureau of Gaming Operations and approved in accordance with § 601a.10(a) (relating to approval of table game layouts, signage and equipment) and if the certificate holder offers the Perfect Pairs wager authorized under subsection (b), the layout shall contain a separate area designated for the placement of the Perfect Pairs wager for each player.

(b) A certificate holder may, if specified in its Rules Submission under § 601a.2 (relating to table games Rules Submissions), offer to each player who placed a Blackjack wager in accordance with § 633a.6(d) (relating to wagers), the option of placing a Perfect Pairs wager which shall win if the player's initial two cards are a colored pair, mixed pair or perfect pair.

(c) After placing a Blackjack wager, as required in § 633a.6(d), and any optional wagers including the Perfect Pairs wager, the dealer shall deal the cards in accordance with § 633a.7(a)—(f) (relating to procedure for dealing the cards; completion of each round of play).

(d) Immediately after the second card is dealt to each player and the dealer, but prior to any additional cards being dealt or before any card reader device is utilized, the dealer shall, starting with the player farthest to the dealer's right and

continuing around the table in a counterclockwise direction, settle the player's optional wagers in accordance with § 633a.7(g) by collecting all losing wagers and paying all winning wagers. If a player placed the Perfect Pairs wager and the player's initial two cards:

(1) Are a colored pair, mixed pair or perfect pair, the dealer shall pay the winning Perfect Pairs wager in accordance with subsection (e).

(2) Are not a colored pair, mixed pair or perfect pair, the dealer shall collect the Perfect Pairs wager.

(e) The certificate holder shall pay out a winning Perfect Pairs wager at the odds in one of the following paytables selected by the certificate holder in its Rules Submission filed in accordance with § 601a.2:

<i>Hand</i>	<i>Paytable A</i>	<i>Paytable B</i>
Perfect pair	25 to 1	30 to 1
Colored pair	12 to 1	10 to 1
Mixed pair	6 to 1	5 to 1

(f) As used in this section, the following words and terms shall have the meanings given to them in this subsection:

§ 633c.2. Jackpot Party progressive wager.

(a) A certificate holder may offer players the option to place a Jackpot Party progressive wager that the dealer's two cards and the player's two cards will form any of the following winning Jackpot Party progressive combinations:

(1) *Royal flush* (diamonds)—Dealer Blackjack and the player's two cards and the dealer's two cards contain an ace, king, queen and jack of diamonds, with the dealer's hand containing the ace of diamonds.

(2) *Royal flush* (other suit)—Dealer Blackjack and the player's two cards and the dealer's two cards contain an ace, king, queen and jack of one the other remaining three suits, with the dealer's hand containing the ace of the same suit.

- (9) A hand with dealer Blackjack.
- (10) *Dealer ace up*—Dealer's upcard is an ace but the dealer does not have a Blackjack.
- (b) The Jackpot Party progressive wager may be played on a Blackjack table that utilizes 1, 2, 4, 6 or 8 decks of cards.
- (c) The layout for a Blackjack table shall be submitted to the Bureau of Gaming Operations and approved in accordance with § 601a.10(a) (relating to approval of table game layouts, signage and equipment) and if the certificate holder offers the Jackpot Party progressive wager, in addition to the requirements in § 633a.2 (relating to Blackjack table; card reader device; physical characteristics; inspections), the layout shall contain a separate area designated for the placement of the Jackpot Party progressive wager for each player.
- (d) If the certificate holder is offering the Jackpot Party progressive wager, the Blackjack table must have a progressive table game system, in accordance with § 605a.7 (relating to progressive table games), for the placement of the Jackpot Party progressive wager. If the certificate holder is offering a progressive payout wager on multiple linked tables or games in the same licensed facility, the progressive table game system must comply with the requirements in § 605a.8 (relating to linked progressive table games). The progressive table game system must include:
- (1) A wagering device at each betting position that acknowledges or accepts the placement of the progressive wager.
 - (2) A device that controls or monitors the placement of progressive wagers at the gaming table, including a mechanism, such as a lock-out button, that prevents the recognition of any progressive wager that a player attempts to place after the dealer has announced "no more bets."
- (e) If specified in its Rules Submission required under § 601a.2 (relating to table games Rules Submissions), a certificate holder may offer to each player who placed a Blackjack wager in accordance with § 633a.6(d) (relating to wagers) the option of placing a Jackpot Party progressive wager of \$1 or \$5.
- (f) After placing a Blackjack wager, as required in § 633a.6(d), and any optional wagers including the Jackpot Party progressive wager, the dealer shall announce "no more bets" and, if the Jackpot Party progressive wager is being offered, use the progressive table game system to prevent the placement of any additional progressive wagers. If any progressive wagers have been made, the

dealer shall collect the wagers and, on the layout in front of the table inventory container, verify that the number of value chips wagered equals the number of progressive wagers accepted by the progressive table game system. The dealer shall then place the value chips into the table inventory container.

(g) The dealer shall then deal the cards in accordance with § 633a.7(a)—(f) (relating to procedure for dealing the cards; completion of each round of play). Immediately after the second card is dealt to each player and the dealer, but prior to any additional cards being dealt, the dealer shall determine if he has a Blackjack as provided in § 633a.7(h). If the dealer:

(1) Does not have an ace showing or have a Blackjack, all Jackpot Party progressive wagers shall lose and the dealer shall continue the hand in accordance with § 633a.7(i)—(t).

(2) Has an ace showing or a Blackjack, the dealer shall settle each player's winning Jackpot Party progressive wager as provided in subsection (h).

(h) If a player has won a Jackpot Party progressive payout, the dealer shall:

(1) Verify that the hand is a winning hand.

(2) Verify that the appropriate light on the progressive table game system has been illuminated.

(3) Have a floorperson or above validate the progressive payout in accordance with the certificate holder's approved internal control procedures.

(4) Pay the winning Jackpot Party progressive wager in accordance with the payout odds in subsection (i). If a player has won a progressive payout that is a percentage of the jackpot amount on the progressive meter, the progressive payout may not be paid from the table inventory container. If a player has won a progressive payout that is not being paid from the table inventory container, the cards of that player must remain on the table until the necessary documentation has been completed.

(i) The certificate holder shall pay out a winning Jackpot Party progressive wager, for the highest ranking four-card hand formed, at the odds in one of the following payout tables selected by the certificate holder in its Rules Submission filed in accordance with § 601a.2:

(5) *Two non-suited matches*—Both of the player's cards match the rank of the dealer's upcard.

The dealer shall then place the value chips into the table inventory container.

(g) The dealer shall then deal the cards in accordance with § 633a.7(a)—(g) (relating to procedure for dealing the cards; completion of each round of play).
